

## Professor Bummbastic and the time machine

### An interactive and action-packed show for families. From 5 years.

In the brand new science show "The Supercomputer", families join Professor Bummbastic to discover the amazing abilities of the human brain, which also contains all our hopes, dreams and desires. Professor Bummbastic uses fascinating experiments to bring you a little closer to neuroscience. Together we will also put our senses to the test!

The boundaries of physics are crossed and the participants find themselves in biology. Here, carnivorous plants and snakes equipped with heat sensors await them. As you can see, the animal and plant kingdoms are not short of super tricks. Of course, crowd favorite NAO, Professor Bummbastic's cheeky, humanoid robot assistant, will not be missing. Also on board are Concordia's popular laboratory stations, where children can experiment for themselves an hour before the show begins.

"The Supercomputer" is an interactive and action-packed science show by Professor Bummbastic. Is it about an unbeatable supercomputer or much more? Be surprised and discover the laws and wonders of nature. Understand how our unique world works.

A program by and with Raphael Oldani presented by Concordia.

Surprise! Download the new coloring picture by Professor Bummbastic & Conci at [www.concordia.ch/bummbastic](http://www.concordia.ch/bummbastic), design it however you like, bring it to the show and exchange it for a small surprise at the Concordia Lounge.

Language: Swiss dialect

Foyer, lab stations & box office: open 75 minutes before the start of the performance (only payable with Twint)

### Venue:

Brauipplatz 5  
6280 Hochdorf
