4 km  
Distance

2 h 2 min  
Duration

918 m  
Altitude

28 m  
Altitude descending

2608 m  
Highest Point

1690 m  
Lowest Point

**The Laucherenstock is a beautiful, popular north slope tour with a wonderful view.**

The elongated elevation, which protrudes only slightly from the Ruchstock-Sättelstock connecting ridge, is easy to climb on skis. The rubble of the steep ascent is interrupted by a transverse depression under the summit structure. Once you reach the top, you can enjoy a wonderful view before taking the descent in the snow-covered landscape under your feet.

### Safety Guidelines:

#### Safety tips for off-piste skiing

- Please note that you are travelling at your own risk.
- A ski tour must be carefully planned.
- Appropriate equipment (avalanche transceiver, probe, shovel, airbag) and clothing are essential safety factors.
- The local ski and mountain guides will take you safely to your destination and back home.
- Emergency call REGA telephone number 1414
