### NatuRigi - so that the flower meadows on the south side of the Rigi continue to bloom

Many natural treasures grow on the south side of the Rigi from Greppen to Brunnen. It is a species-rich, originally wild flora and fauna with 900 flowering plants, 300 lichens, 100 mosses, well over 1000 insects, breeding birds, reptiles, amphibians and mammals. This diversity exists thanks to the special geology, the natural history, the mild lake climate and the careful work of the farming families.

### Information

NatuRigi promotes and protects the natural treasures as well as the natural plant and animal life on the south side of the Rigi. In order for the farming families on the slopes to continue to cultivate the valuable rough pastures, they need a sufficient income. One possible source of income is to process the farm's own products themselves, develop specialities and sell them directly. This is where NatuRigi provides support.
