

## Lucerne's fortification - The Musegg Wall

**Once upon a time, 30 towers and a stone ring protected our city. Climb the Musegg and listen to the stories about the construction of the wall, which is of national value today.**

Built over 600 years ago, covered, wooden battlements still characterise the image of Lucerne today and tell of an eventful, turbulent time. Enjoy the panoramic view and follow the mystical movement of the clock pendulum in the Zyturm.
