The spaceship has landed

In the spectacular architectural sculpture by star architect Zaha Hadid, amazement and experimentation are on the agenda – because a true world of wonders opens up in the Science Center phaeno. More than 300 interactive experimental stations encourage visitors to discover phenomena from science and technology in a playful way and experience them up close. Two visitor labs, the science theatre and the ideas forum offer additional space for varied hands-on activities, lectures and science shows. Thanks to changing special exhibitions, there is never a dull moment, and there is always something new to discover with every visit.
