

Almke outdoor pool

Outdoor pool

A spacious paddling pool with a water hedgehog offers 70 square metres of different water depths, so that even older toddlers feel comfortable. Directly adjacent to the paddling pool is an attractive non-swimmer area. Little water rats can use the wide steps to get deeper and deeper into the non-swimmer area. With different water depths, this area not only allows them to play in the water, but also offers space for their first attempts at swimming. A slide leads into the water and water fountains invite children to splash around so that they don't get bored. The swimmers' area is separated from the non-swimmers' area by a wall. Swimmers can do their laps in five lanes. Starting blocks are available for sports enthusiasts. The diving pool is connected to the swimmers' area. A 1-metre board and a 3-metre board tempt you to jump into the cold water.
