Astronomy park

WMG Wolfsburg

AN ASTRONOMIC JOURNEY IN THE ALLERPARK

Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune can be found here as sculptures in exact proportions. The size of the planets is shown in a ratio of 1:1 billion. The distance between the planets in the Allerpark is 1:4 billion.

The so-called planet trail starts next to the rowing club with the sun, then leads westwards around the Allersee and provides a lot of background information on display boards. This trail was made possible by the Wolfsburg Community Foundation with contributions from individuals and companies.
