## The Money Museum brings the world of money alive with interactive exhibits.

How is cash produced? What is book money? How does monetary policy work and what exactly does a central bank do? What role does money play in a globalised world? These and many more money-related questions are answered with the help of eye-catching and incisive exhibits, appealing installations and more than 60 multimedia stations loaded with games and interactive information. The topics are approached from both a current and a historical perspective. In addition, there is a 360° cinema and the chance for visitors to touch a genuine bar of gold. The exhibition is accessible to persons with disabilities and has been designed in two languages (German and English).
